The Man that Changed It All

Neil Armstrong, the first man on the moon,
Had curiosity and prospered in teams.
He was humble and hard-working,
And inspired people to follow their dreams.

He became an Eagle Scout
Learned to fly before he could drive,
An engineer and teacher,
His humbleness made him thrive.

Neil going into space
He taught people to be strong
This took lots of bravery.
Under pressure he stayed calm.

His legacy impacts us today
He overcame challenges big and small
And as he was there, stepping off Eagle,
He showed us the most courage of all.
